## Laparo-Robotic Symposium

**Cutting edge technology.  
Journey from Better to Best  
Are we ready to adapt?**

**8<sup>th</sup> to 10<sup>th</sup> March 2012**

**Course Director : Mahesh Desai**

Dear Friends,

Robotic Surgery in India is gaining momentum. Is this a necessary technology for India and how does it compare with Laparoscopy? These are the questions we need to answer. I also believe that one has to learn laparoscopy before starting robotics as this is the most effective back up one can have in case of technical failures. Cost of the robotic procedures remains an issue. This course will highlight all these issues and offer a good grounding in Robotics and advanced laparoscopic procedures. We are also providing hands on laparoscopic training for the Novice. We have eminent International and National Faculties to deliberate on all these aspects. There will be free registration for post graduates (only early bird, 1<sup>st</sup> March) with subsidized registration for the hands on courses.

Looking forward to see you again at Nadiad in 2012.

Thanking you,

Yours sincerely,

Dr. Mahesh Desai  
Director, JPAC
